

New Product Release

ARP 4.300" Piston Ring Compressor

available for immediate delivery

Part No. 900-3000

ARP - The World Leader in Fastener Technology has just released a new 4.300" Piston Ring Compressor. ARP Ring Compressors are machined from 6061 T-6 Billet tube material and Type 3 anodized for long life. All ARP Ring Compressors feature a true radius design far superior to conventional "tapered" designs and are relieved for wire O-rings on the bottom. The bore size is prominently engraved in 3/4" high numbers for easy identification.

Part No.	Application
900-3000	4.300" Piston Ring Compressor Tool

ARP products are available worldwide through local distributors
