

New Product Release

Chevy 6.6L Duramax Damper Bolt & Washer Kits available for immediate delivery

ARP - The World Leader in Fastener Technology has just released new Harmonic Damper Bolt and Washer kits for the Chevrolet 6.6L Duramax applications.

Both kits are manufactured from premium grade chrome moly steel with a Black Oxide finish. The Damper bolt features a low profile 12-Point head, 200,000 psi tensile strength rating and includes a 1/2 oz. pack of ARP Ultra-Torque fastener assembly lubricant. For applications where clearance is not an issue, the Washer kit features a chamfered ID, beveled edge and fully CNC machined surfaces. ARP driveline fasteners are cold forged to ensure molecular integrity, heat treated prior to thread rolling and machining and designed to exceed the OEM fasteners in strength and durability.

Part No.	Application
129-2503	Chevrolet 6.6L Duramax Harmonic Damper Bolt Kit
200-8793	Chevrolet 6.6L Duramax Harmonic Damper Washer Kit

ARP products are available worldwide through local distributors
