

New Product Release

Big Block Chevy Mark IV With Merlin Heads Head Stud Kits

available for immediate delivery

ARP - The World Leader in Fastener Technology has just released eight new Pro Series head stud kits for Big Block Chevy with raised exhaust port Merlin Heads. These kits are manufactured with premium grade 8740 chrome moly material and available with Hex or 12-Point nuts and undercut studs. All ARP Pro Series studs are centerless ground, heat treated prior to thread rolling and machining and nominally rated at 200,000 psi tensile strength. Each kit includes a 1/2 oz. pack of ARP Ultra-Torque Fastener Assembly Lubricant.
